Dear Mr. Géracitano:

I have been informed of the recent favourable decision of the Canadian Radio-television Telecommunications Commission to approve your application to have your television channel, *Avis de Recherche*, designated for mandatory distribution on basic digital satellite and cable systems in the Province of Quebec.

Broadcasting initiatives such as yours make an important contribution to crime prevention and public safety by promoting collaboration between the public safety community and the public. Greater information sharing on suspects and missing persons, as provided by *Avis de Recherche*, will better enable our law enforcement agencies to ensure the safety and security of our communities.

Please accept my best wishes for your initiative and new service distribution.

Yours sincerely,
